

create or modify a blog

activity 2

Step 1: Create or Modify a Blog

If no one in the group has a blog, go to <http://wordpress.com/> and select someone in the group to register for a blog. Directions for configuring the blog can be found at <http://timcushman.com/presentations.html> under the heading of “Blogging.”

Step 2: Create a Post

The group should work together to create a post that:

[Get ideas here: <http://blog.mrmeyer.com/?cat=70>]

1. Uses a “hook” to get students curious about a concept or topic
2. Engages students by using “real world” problem solving. This is often just a matter of reworking a problem from the book or other source. This typically involves either an image, video clip, or audio recording.

Step 3: Manage Student Responses

Discuss the expectations you will communicate to your students for using the blog.
