

create a screencast with Jing

Activity 4

Step 1: Download the Software

Jing is free and can be downloaded here: <http://www.techsmith.com/download/jing/>

Step 2: Identify the Content

Effective video tutorials are efficient and focus on a main idea or a portion of a process. Limit the length of a screencast to 3 – 5 minutes and organize the video around a single topic or key idea.

Step 3: Write a Script

Choose a topic that you will be teaching in the next few months. Create a basic outline for the screencast and then begin by writing a script for the video's narration. There are great ideas for types of screencasts here:

<http://www.flip Teaching.com/>

Step 4: Record the Screencast
